# STEPS
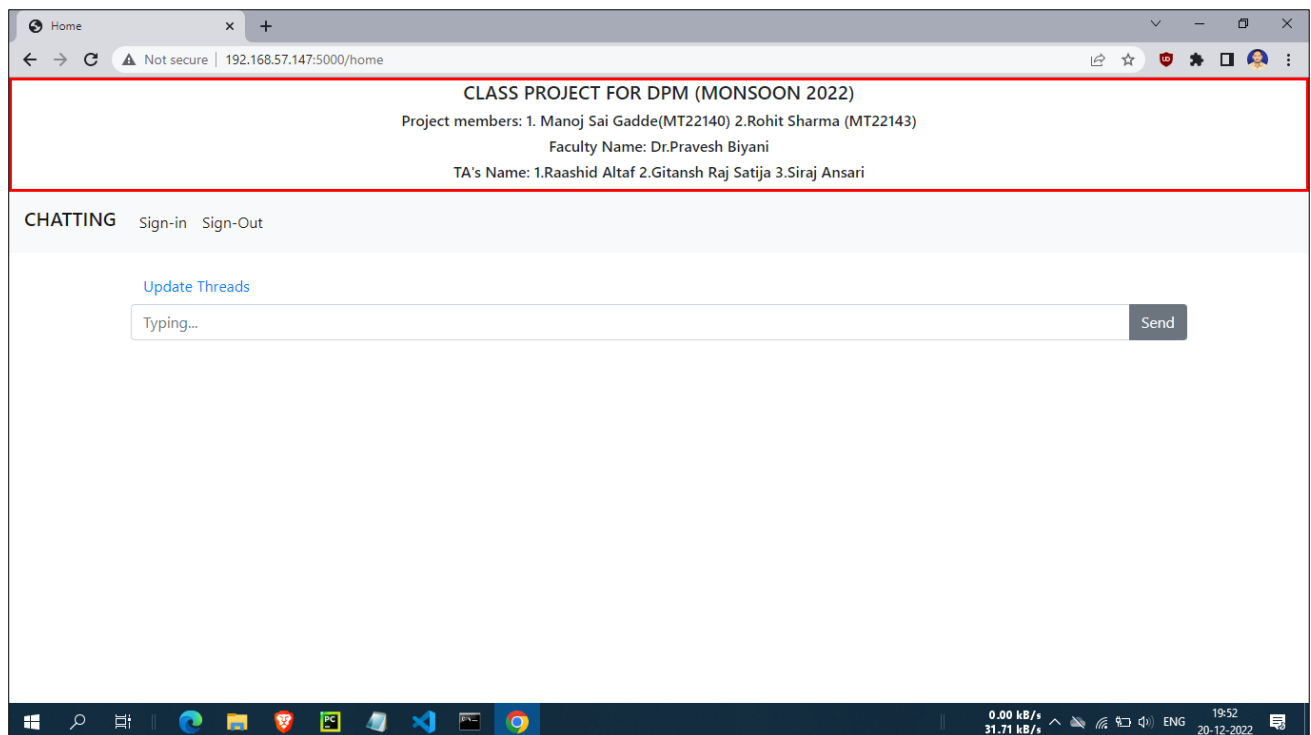

1. This page will appear when the new user clicks on the web link.

2. As soon as the user enters his name and clicks on the submit button, he will be entered into the chatting window. (eg: Ravi)
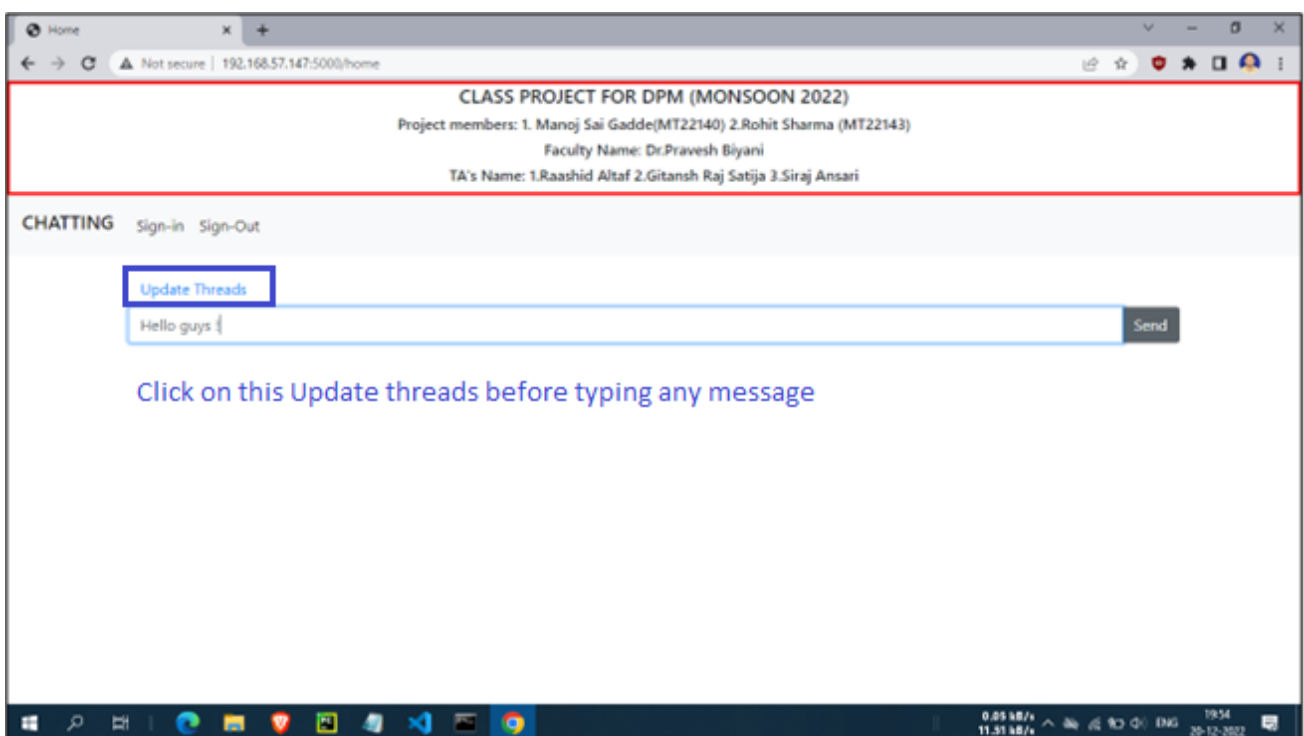

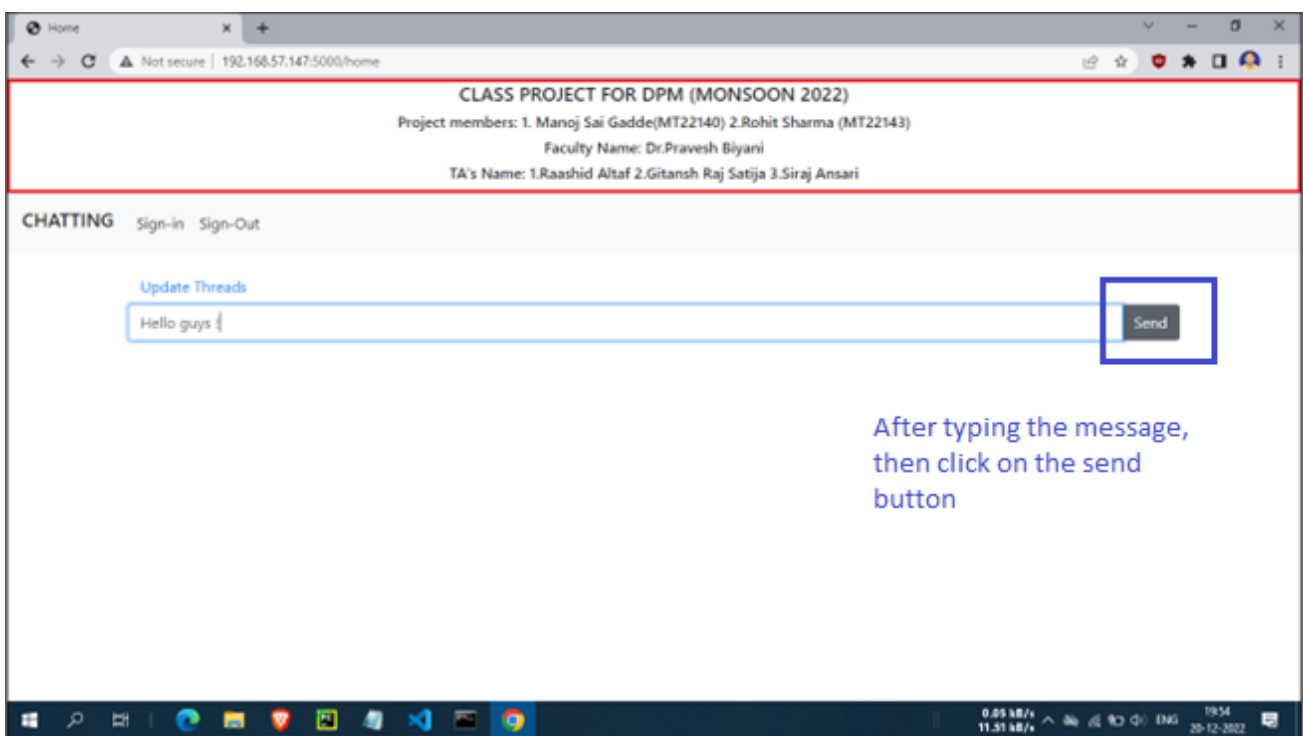

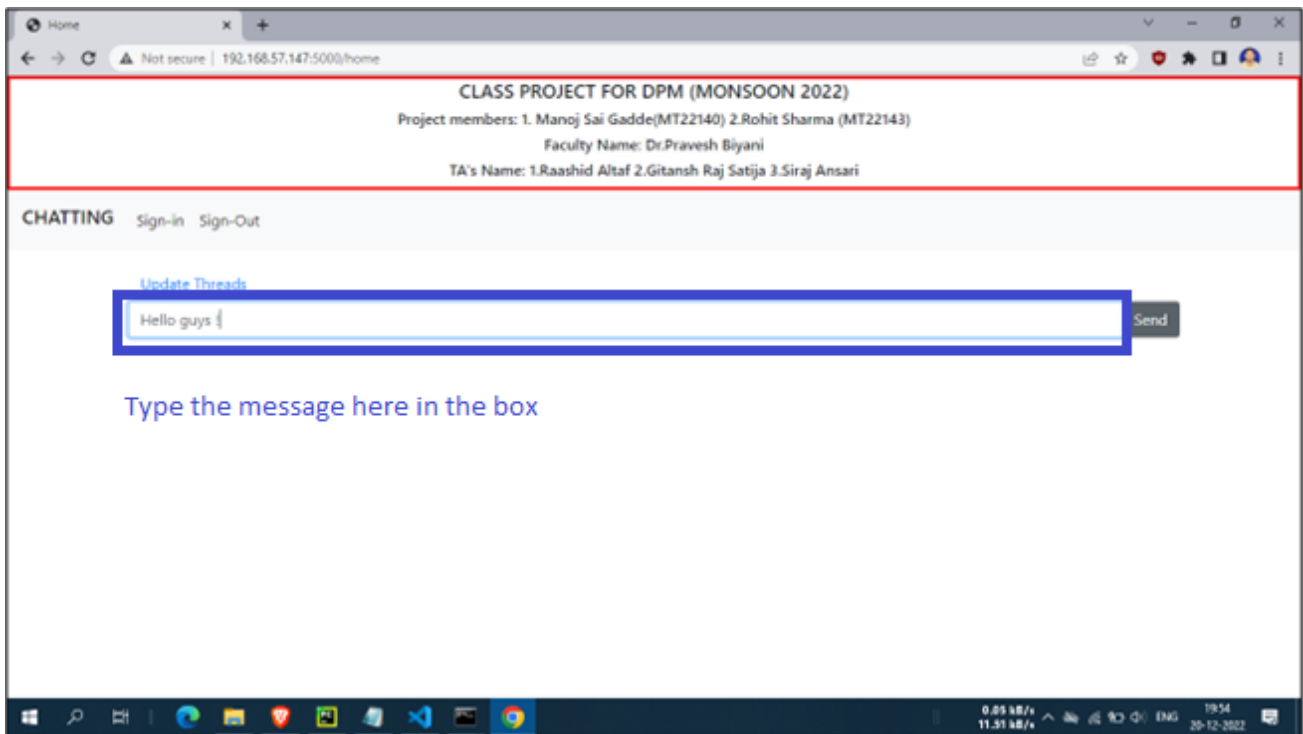

3. Now the User entered into the chat and the chatting window will look like this.

4. **(**IMP NOTE **: Make sure you click the update Threads button before typing any message and then send)**
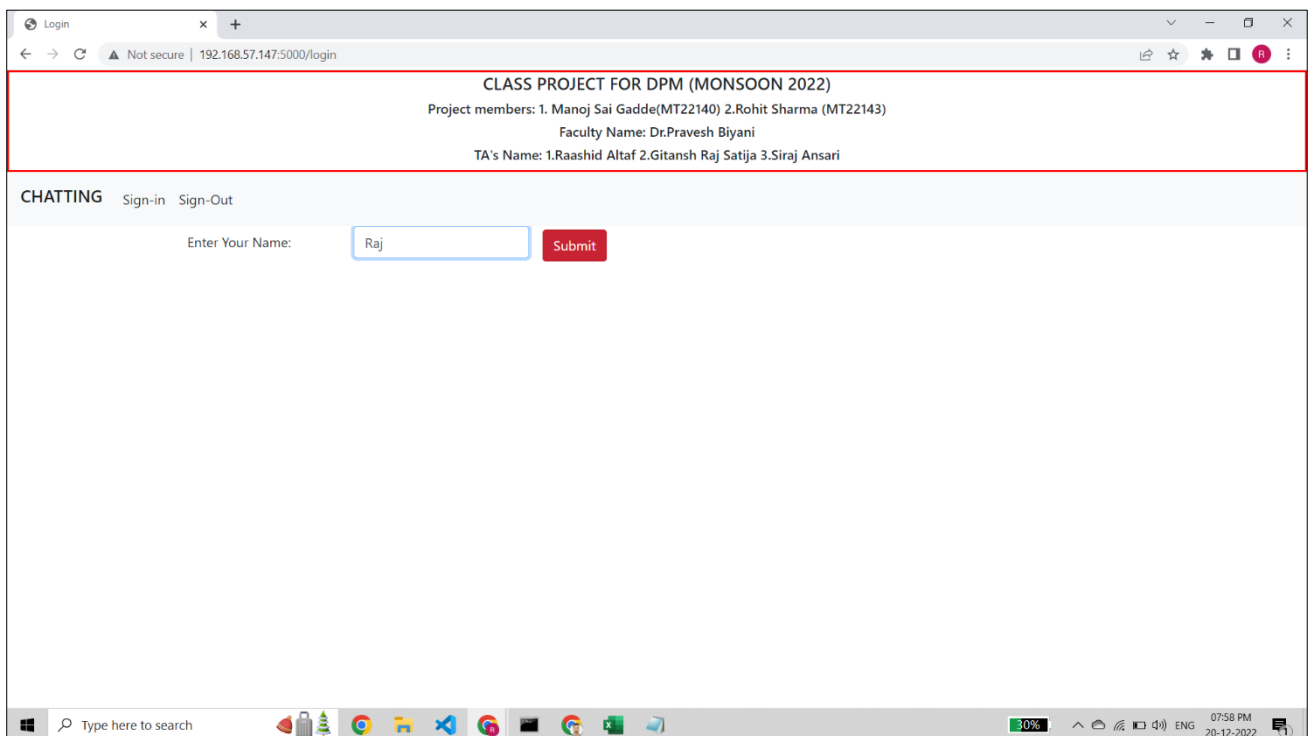

Now type the message and then click on send.

Type the message here in the box

After typing the message, then click on the send button

## 5. The chatting window will now display the messages.

## 6. The new user will now be able to log in using the same link as before.

7. **(**IMP NOTE **: Make sure you click the update Threads button before typing any message and then send).**

Additionally, the other user has been added to the chatting room, and he can now type and send messages.

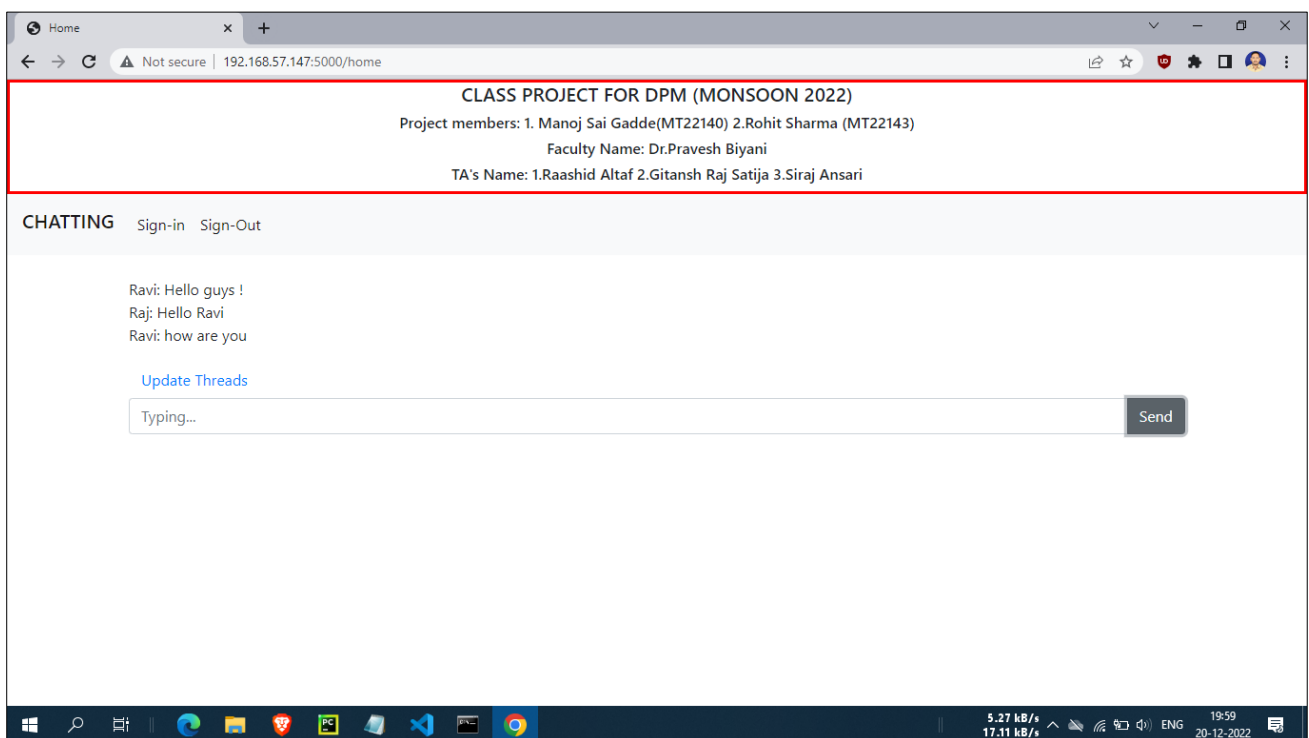

8. The chatting window has been updated.

9. (IMP NOTE : **Make sure you click the update Threads button before typing any message and then send).**

Once again, Ravi will send the message to the same chatting window.

10. In the window, the message has been updated.

11. **(**IMP NOTE **: Make sure you click the update Threads button before typing any message and then send button)**

Now Raj will send the message.

12. Updated chat window.
